

Mori-Seiki SL-75

UNOFFICIAL ENGLISH TECHNICAL REFERENCE

Selected factory specifications from the Japanese brochure. Catalog values do not confirm the installed machine configuration.

Common specifications

Item	Published value
Swing over bed / cross-slide	910 / 580 mm
Maximum machining diameter	760 mm
Maximum machining length	1530 mm with 15-inch chuck
Physical X / Z stroke	400 (20 + 380) / 1550 mm
X / Z maximum rapid	5000 / 8000 mm/min
Turret stations	12

Variant-specific spindle data

Item	SL-75A	SL-75B	SL-75C
Spindle speed (rpm)	3-1800	4-1010	2-580
Low-speed specification (rpm)	2-1135	3-874	Not listed
Gear ranges	3	2	2
Spindle through-bore (mm)	105	168	260
Between centers (mm)	1750	1750	1660

Stroke is physical slide travel, not signed coordinate limits or home. Do not assume third-gear availability for every SL-75 variant. Reference data does not change G-Code Studio's selected machine settings.
